
Necta
Barista 1000 Range
Product Presentation
Updated February 2026

Highlights

- Elegant design: Barista 1000 leads the way in hot drinks vending and pairs elegantly with Necta's snack range
- 2 models available – either Touchscreen or Direct selection
- Drink technology: Z4000 Espresso brewer + Tea brewer for freshly brewed tea
- Double boiler for high throughput
- In-built, two-way connectivity (Barista 1000 Touch only)
- Suited to many different locations, including:
  - Workplaces including Offices, Factories and warehouses
  - Public locations such as Education and Healthcare

Necta

Barista 1000 Touch

- Elegant design paired with the latest technology and operational efficiency:
  - Powerful software platform
  - Streamlined internal layout and synergy across the Necta range
  - Unlimited selections and drinks that meet consumer expectations
  - A flexible and dynamic user interface incorporates the digital technology that features widely in the rest of our day to day lives, including an attractive 24" full HD touchscreen with speakers
  - High brightness touchscreen, with perfect visibility and guaranteed screen life
  - Cloud-based, two-way connectivity for remote control of the machine
- The best consumer experience:
  - Intuitive to use
  - Optional Automatic door for delivery area
  - Delivers cutting-edge performance across a wide choice of drinks, and gives consumers the ability to customise their drink
  - Entertains and/or informs consumers while waiting for their drink

Necta

Barista 1000 Direct Selection

- Elegant design paired with the latest technology and operational efficiency:
  - Streamlined internal layout and synergy across the Necta range
  - 18 LED illuminated direct selection buttons (plus 4 pre-selections)
- The best consumer experience:
  - Intuitive to use
  - Delivers cutting-edge performance across a wide choice of drinks
  - Large colour TFT display for improved visibility

Necta

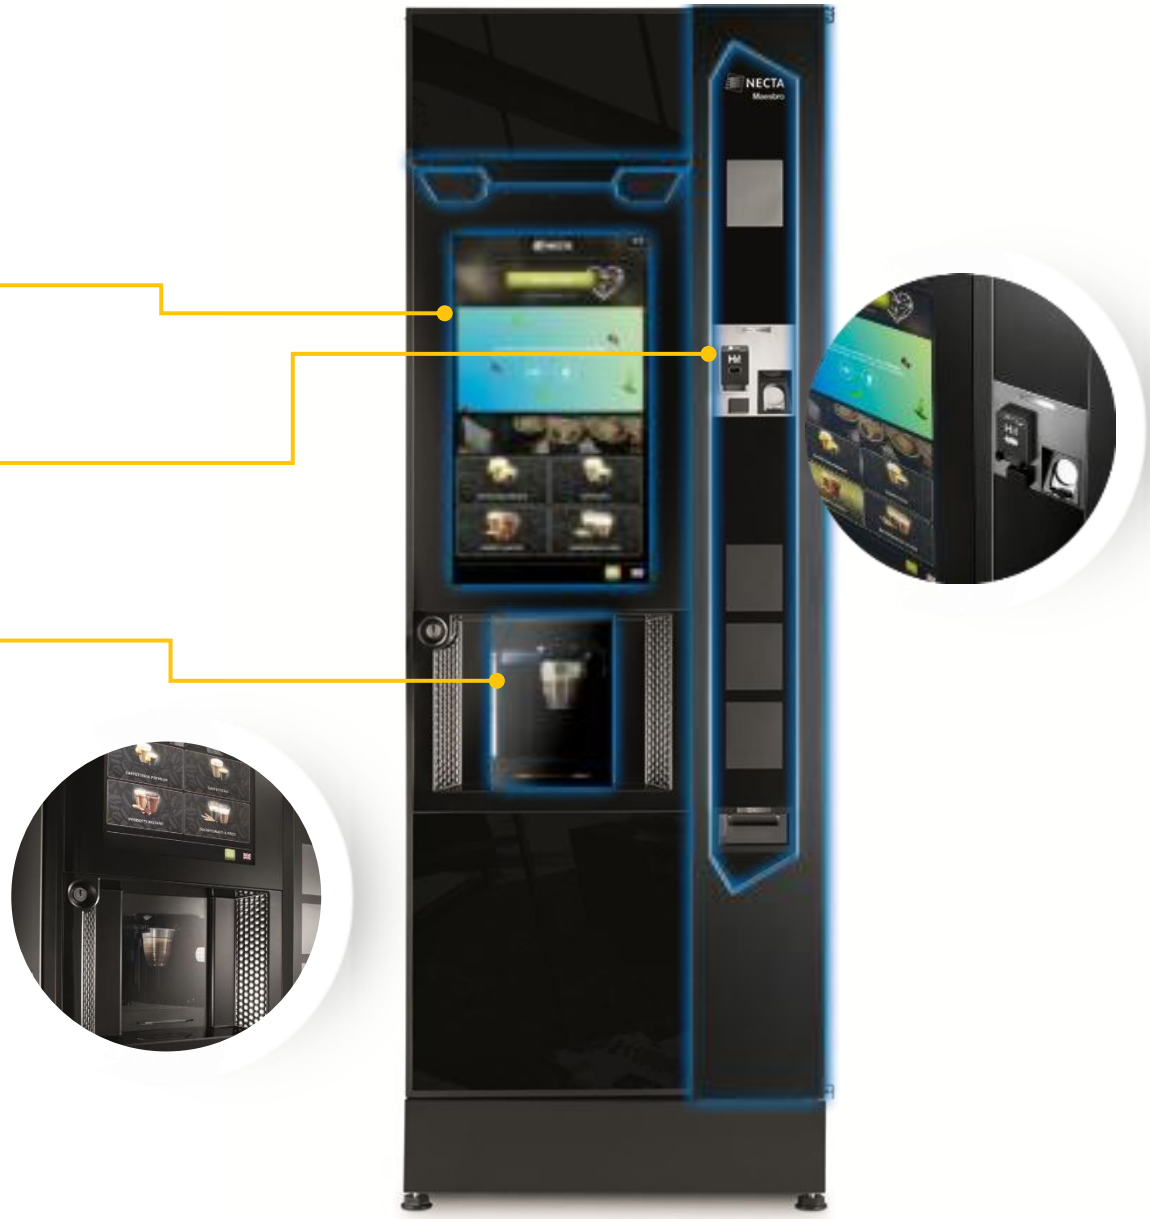

Operational Efficiencies

- Drink Technology:
  - Coffee brewer
    - 16g coffee brewer – only one shot needed to create 12oz drinks
    - Z4000 espresso unit is easy to remove
  - Tea brewer
    - Uses 40% less tea to make the drink, saving costs on ingredients
- Colour coded internal parts for ease of maintenance and operation
- Software
  - Significant advances in functionality compared with previous Necta hot drinks machines
  - Barista 1000 Touch - Pre and post selection available
  - On request, Barista 1000 Direct Selection can be configured to enable the "Build a Drink" function - allowing post-drink selection of drink strength and sugar on this model
- Ultimate flexibility
  - Create unlimited drink variants and selections (Barista 1000 Touch only)
  - Intuitive software makes this simple to achieve

Necta

Modern & Attractive Design

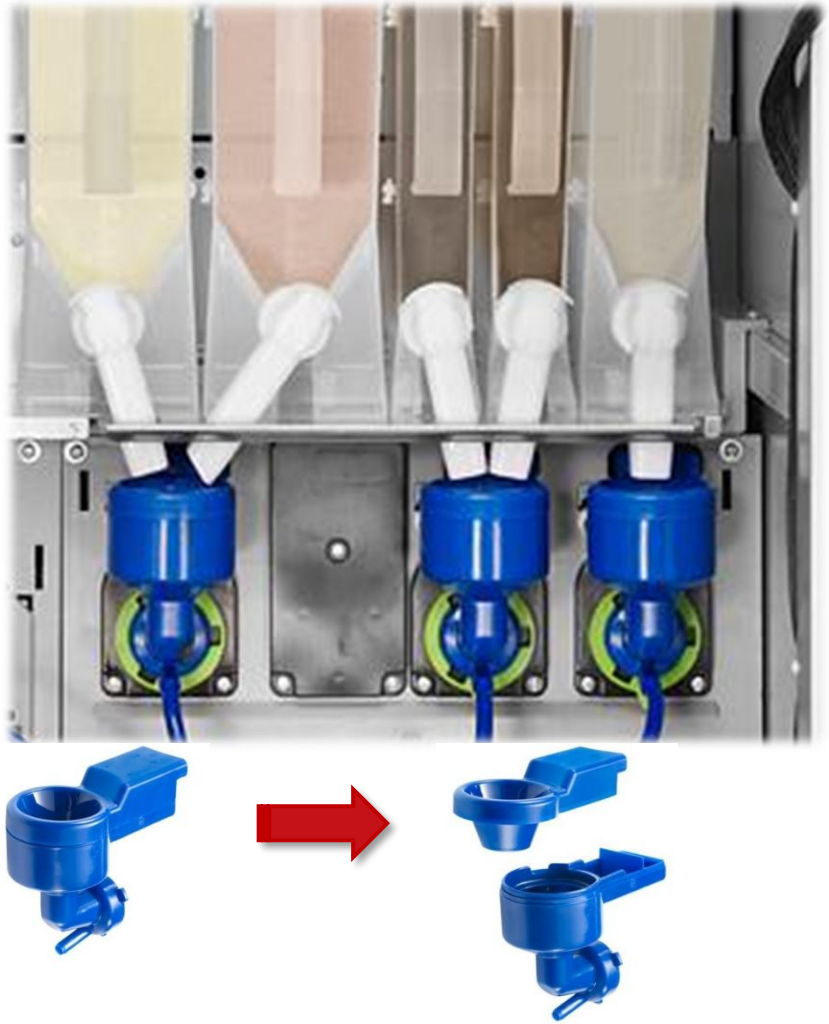

- A dark grey cabinet and all black door, with frameless touch-screen
- Door profiles in anodised aluminium with diamond effect incision
- Wide delivery area

Necta

Instant FREEMIX Technology

- Newly designed mixers and adjustable ingredient motors
- Speed can be customised according to individual needs (quality vs speed): powder flow, speed mixing
- Greater flexibility in drink creation
- Easier to remove and clean

Necta

Improved User Experience

- **Barista 1000 Touch** features a fast and reactive, full HD touch-screen, which enhances the overall consumer experience
- This dynamic and appealing user interface improves consumer interaction, engagement and entertainment
- Consumer benefits include:
  - A familiar purchase experience – as simple as using a smartphone
  - An extensive drinks menu that makes it possible to create their own customised drink and quick selection of their saved favourite
  - Easily navigated product categories
  - The ability to consult nutritional information to help make lifestyle choices

Necta

Software Platform

- **Barista 1000 Touch** software is standardised across the Evoca Touchscreen machine range, reducing operating costs and time needed for training:
  - Smart phone-style interface
  - Program the machine on a laptop and upload via USB
  - Quick and easy to use, including Drag & Drop function
  - Quicker machine diagnosis / maintenance
  - Training efficiencies - familiarity across the Evoca range

Necta

Customisable Graphics

- Tailor the Graphical User Interface (GUI) on **Barista 1000 Touch** (only) using our simple tool
- Customise in-built graphics or develop your own
- Create menus, promotions and upselling, or host multi media content
  - Play high resolution videos for promotion or entertainment
  - Communicate promotional offers for easy & effective upselling
- Differentiate yourself from competitors and create brand awareness

Necta

Product Sustainability Fact Sheet

Updated 14.04.2025
