COFFETEK

All-in-one
coffee machine and water fountain

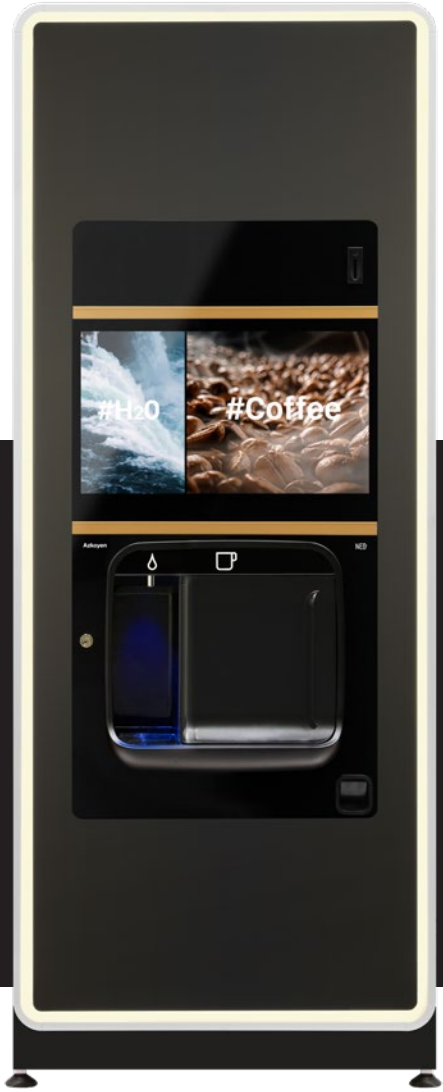

Offering Pure & fresh filtered water and the most exquisite espresso coffee & hot drink menu.

NEO Q is the perfect solution for all those who need to provide their customers with quality water and hot drinks and who are committed to sustainability.

The new NEO Q offers **Quality fresh filtered water** and **Quality coffee** in a single machine.

An innovative concept that e**ncourages sustainability** in workplaces, leisure centres, gyms and other establishments, promoting the use of your own cup or bottle.

Neo Q has been carefully designed, down to the last detail, to provide a machine that is both aesthetically appealing and customisable. Its interactive display has been engineered to make it easier to operate and programme to improve the user experience.

Product

Espresso	Instant	**AZK V10** Espresso group
Filtered Water	Touch Screen	LED
+100 More than 100 Selections	Cup sensor	Various payment methods

Improve your Profitability

Two in one means less equipment investment and footprint optimisation, whilst providing and excellent water & coffee service.

Reduce your costs

The machine installation time is optimised and reduced. There is only one machine to be installed instead of two.

You will make **less visits** to the location because there is no water bottle or container to refill or replace.

Also, the machine's large capacity of 1,500 cups will help you to **reduce the number of visits** which will have a positive impact on your balance line.

Increased consumption

Double bean means doubling the range of your machine and increasing its profitability by allowing you to offer different types of coffee thereby reaching many more consumers.

Water in the same machine means it receives more visits, thereby attracting more customers and the possibility of higher consumption of other drinks.

Win new locations and tenders

All-in-one means securing those locations that need to provide both water and coffee services but that don't have the space to install two machines.

It offers an original and distinct design whenever you need it

The versatility of its design allows you to adapt to your customer, as well as to refurbish the machine by just replacing the front part.

It only takes 5 minutes to change the front of your machine - low cost and simple to update the design.

Intuitive and interactive screen

A screen designed to make maintenance tasks easy and efficient for any operator.

Its simple programming system helps you to customise recipes or prices very easily.

Neo Q interface maximises user experience, guiding the user through the purchase process with ease.

Water & Coffee
Two machines in one. Freshly ground espresso coffee and cold filtered water

Sensor I-Detect
Identifies the consumer's cup, thus saving on disposable cups

LED
Attractive lighting to encourage impulse buying.

Freshly ground coffee beans

Offering the peace of mind that comes with providing an exceptional coffee service

Thanks to the double bean, you can offer your customer the option of various speciality coffees to satisfy the tastes of even the most demanding consumer.

With a wide range of recipes, you can offer variety and thus reach as many people as possible. From the highest quality espresso-based hot drinks to delicious chocolates, teas and vanilla or other flavoured drinks.

Unlimited Water

Cold filtered water

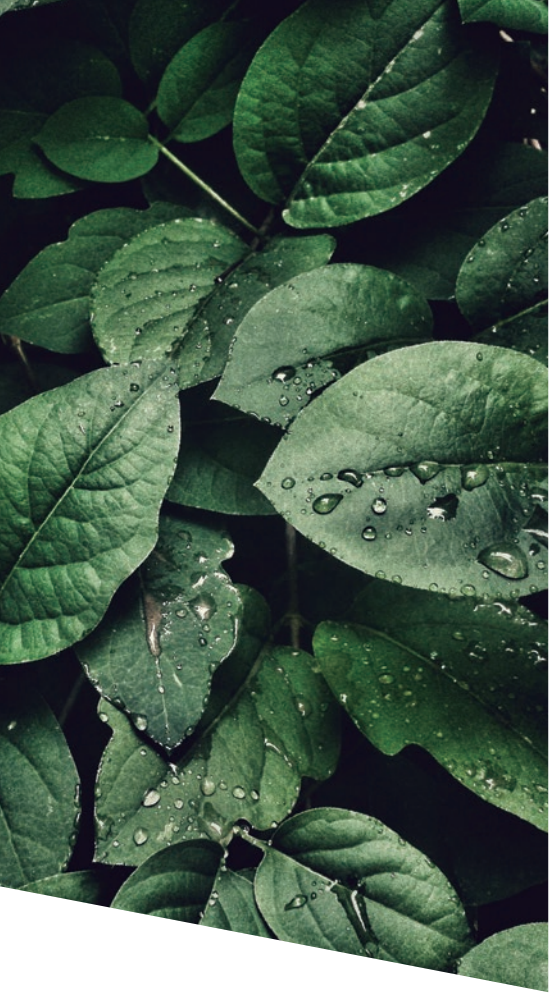

Neo Q's filtration system gets rid of impurities, providing a tasteless and odourless water, providing better water quality than a traditional mains water tap.

Furthermore, the ultraviolet light filtration and purification optional kit, helps to eliminate bacterias on the spot -

allowing you to offer a much more pure and safe water service to your customer.

Offering cold water is also possible with Neo Q's water chiller option. An option for those seekint to dispense cold water instantly.

Neo Q avoids cross-contamination, the water will allways remaining pure and uncontaminated- as the water outlet has its independent and dedicated dispense area.

CO_2 reducción

Sustainable

Promotes the re-use of materials, reducing single use plastic consumption while diminishing CO_2 impact.

Promotes the use of your own bottle

Neo Q encourages the use of reusable bottles & glasses, whilst discouraging the use of disposable ones.

It is a much more sustainable way of water consumption, directly from the mains supply, no transport no plastic, directly to the consumer.

Promote Own cup use.

The Neo's I-Detect allows automatic detection of the users cup, avoiding the use of disposable cups.
